

# GREASE TRAP TREATMENTS

*NO Pump Outs! Eliminate Foul Odours! Prevent drain buildups!*

## 1. PURGE

### *Citrus Grease Trap Treatment*

Purge is used for a one time cleanup of your grease trap prior to treatment with Bactotrap. Purge instantly emulsifies all grease accumulations and eliminates foul odours. Purge does what “pump outs” cannot do which is cleaning the entire trap and eliminating foul odours.

## 2. BACTOTRAP

### *Bacterial Grease Trap Treatment*

Using “Evcor’s Drip System”, Bactotrap is fed directly into the lid of your grease trap ensuring it treats the source of where your grease is – floating on the surface of your trap!

- Contains billions of dormant bacterial spores which release specific enzymes to break down & digest all FOG’s.
- Only by-product of CO<sub>2</sub> H<sub>2</sub>O go down drains
- Evcor’s Drip System is custom programmed to run during low periods of kitchen activity & up to 24 Events per day.
- Evcor’s Service Technician calibrates & installs the system reducing your staff costs. Includes Lifetime Warranty & regular service visits at no extra charge!!
